DEPARTMENT OF THE ARMY  
OFFICE OF THE ASSISTANT CHIEF OF STAFF, INTELLIGENCE  
WASHINGTON 25, D. C.

ACSI-CI

24 FEB 1959

MEMORANDUM FOR: CHAIRMAN, UTILIZATION ADVISORY BOARD

SUBJECT: Temporary Sanitization of CHESS Material (S)

HANDLE VIA TALENT  
CONTROL SYSTEM ONLY

1. The Army Map Service is currently implementing a program to extend geodetic control into the U.S.S.R. from known points near the termini of Project overflights.
2. Due to the complexities of the analytical method required, the only feasible procedure to follow is the utilization of an electronic computer such as Univac. Investigation has disclosed that there exists no computer programmed analytical method within a TALENT cleared area. At present, the nearest and most reliable program for this purpose has been coded for the Army Map Service Univac.
3. In order to utilize this existing facility, the Army Member of the Utilization Advisory Board requests permission to temporarily sanitize geodetic control data extracted from CHESS material. The planned procedures and controls to be applied are set forth in the attached proposed annex to the UAB Policy Manual.
4. This document cannot be downgraded until restrictions as established by ATCOM 1956 are removed.
